INTRODUCTION.

Since the publication of my *Prolegomena* in January last, further investigation of the tonic phenomena presented by the *Carmen Arvale* has revealed to me in fuller light the great tonic laws of Latin speech and rhythm. This brief supplement, which will be laid before the American Philological Association at the Toronto meeting in December of the current year, presents our ancient cryptograph of the sacred spear-cult and Saturnian-ritual of Mars in all its glory as the Alpha and Omega of tonic inquiry; it will outline summarily the tonic laws of Latin speech and rhythm; and it will develop historically the salient criteria of artistic evolution.

The distinguishing difference between my final conclusions and those of Hellenizing science will be found to lie in the substitution of the principle of the initial accent and descending ictus (*Ictuum Descensio*) for the phonetically inadequate and erroneous generalization of the *Paenultima Law*, and in the substitution of the principle of the sustained accentual thesis and ictual arsis (*Ictuum Sublatio*) for the barren and irrelevant incident of Hellenizing quantity.

The Tonic Laws of Latin Speech and Rhythm.

I. The Latin Tones.

- 1°. The Ictual Acatulexis = \bar{O} : Unsustained grave medial stress = Ictus Anceps.
- 2°. The Ictual Catalexis = $C' = 1$: Sustained subaccentual grave final or vice stress = The Ictus.
- 3°. The Bi-ictual or Unaccentual Acatulexis = $A = 2$: Unsustained acute initial and medial stress before O .
- 4°. The Tri-ictual or Unaccentual Catalexis = Paracatalexis = $P = 3$: Sustained acute initial and medial stress before C .
- 5°. The Quadro-ictual or Bi-accentual Acatulexis und Paracatalexis = Procatalexis = $P' = 4$: Strongly Sustained acute initial or free stress before A or P .

II. Tonic Illustration: *quē, vē, āb, ēl, ōb = C; nēv, ārmā, faciē, cēnsor, subigīt = P-C; Scīhō, omniā, faciā, faciū = A-o-C; Imperator = A-o-P-C; Camēnā, versutū, faciā, faciū = P'-P-C; Mārs, fir = P.*

III. Rhythmic Illustration: Acatlectic or Unsustained Ict: *Scīhō, omniā = A-o-C, Camēnā, versutū, superāssēs = P'-A-o; Catalectic or Sustained Ict: nēv, ārmā, faciē, cēnsor, subigīt, suū, virō, dēdēm, mērito = P-C; Scīhō, omniā, faciā, faciū = A-o-C, Camēnā, versutū, faciā, faciū = P'-P-C; Acatlectic or Unsustained Dydodies: imperator = A-o-A-o; Camēnā, versutū, faciā, faciū, superāssēs = P'-A-o; Catalectic or Sustained Dydodies: nēv, ārmā, faciē, cēnsor, subigīt, suū, virō = P-C; Scīhō, omniā, faciā, faciū = A-o-C; imperator = A-o-P-C; Camēnā, versutū, faciā, faciū, superāssēs = P'-P-C.*

IV. The Tonic Law of Speech: The Law of the Initial Accent and the Final Ictus: Ictuum Descensio.

Note 1. The Paenultima Law: A phonetic illusion missing the Procatalectic Dominant Tone of Latin Speech,

V. The Tonic Law of Rhythm: The Law of the Sustained Initial Accent in Thesis and the Sustained Final Ictus in Arsis: Ictuum Sublatio.

Note 1. The Quantitative Law: An irrelevant and artificial incident mistaken for the reality.

VI. Rhythmic Evolution from the Graphic Formula of Prose $P'APC$: $P'APC$, which permits any sequence, to the Graphic Formula of Perfect Art $P'APC$: $P'P$, which excludes $C-C$, $C-A$, $A-A$, and thus requires that the Accentual Thesis shall not oftener than once fall below the Tonic Horizon of Paracatalexis, and then only after Procatalexis in the sustained rhythm, and never after Catalexis, and that the Ictual Arsis in like manner shall not oftener than once fall below the Tonic Horizon of Catalexis, and then only under the same conditions.

The Evolution of Latin Rhythmic Art.
